

Luke Bailey
Titans Rugby League Player

Intelligent Ice report:

I have played professional rugby league for 11 years and due to this contact sport have received many injuries.

I have been using the new product Intelligent Ice over the past 6 months with excellent results..if I get a sore spot or injury I get out the intelligent ice.

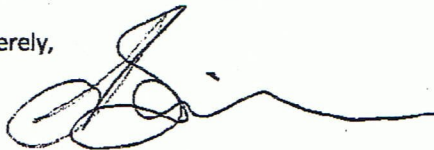

The benefits are the intelligent ice comes in an easy to fit cover which you can attach easily to any part of your body. The other big advantage is you can strap it on straight after a match or injury and is great for home and away games.

Over the past 11 years of my career I have used many kinds of ice an injury prevention products. A none seem more effective or more comfortable then the intelligent ice .

As we cannot afford to miss training or matches I have found the recovery period after an injury is very quick when using the intelligent ice as you can use it all day and night without any mess or freeze burn.

I highly recommend Intelligent Ice.

Sincerely,

Luke Bailey
