Intelligent Ice
Po Box 407
Main Beach QLD 4217

Dear Adrian,

Re: Intelligent Ice Pack

Before I had the chance to properly evaluate your product my son, Michael, borrowed it and wont return it.

He has a chronic cruciate ligament deficient left knee for which he has had a number of surgical procedures including reconstructive surgery and bone grafting. He is current awaiting a graft which is culturing at present. He now has developed a chronic inflammatory/degenerative condition in the knee joint.

He is a member of Manpower and is due to return to Las Vegas next week for another nine month tour. He has found the **Intelligent Ice** reduces the inflammation and swelling in the knee between rehearsals and performances. The ability to apply the ice pack for a prolonged period is a significant benefit.

Michael has tried numerous antiinflammatory medications, applications and devices and has stated the **Intelligent Ice** is the best so far in effectiveness in reducing his chronic inflammation in the joint by reducing pain and swelling.

Hopefully the **Intelligent Ice** will help him through the rugged upcoming tour.

Yours faithfully,

Dr George Clegg
