April 23, 2012

Here is my endorsement.

I am a Sports Medicine Orthopedic Specialist who works at the Kerlan-Jobe Orthopedic Clinic and at USC. I take care of many athletes both week-end warriors and high level athletes including jockeys. Ice is documented to reduce swelling and pain, but there can be problems with conventional ice treatments. Ice can burn the skin and freeze nerves if left in place for too long. This limits its efficacy. Intelligent Ice is a new product which works well without causing problems. By properly controlling the temperature, it can be used for long periods of time. It is easy to apply and affordable.

I think it is the best cooling product on the market and I recommend it for athletes and patients alike.

Sincerely,

James Tibone, MD
