---

03/02/2010.

Many of my patients have reported excellent results from using the Intelligent Ice product, with it's many advantages over conventional ice /freezing products.

They have been using it for many types of acute and chronic bone and connective tissue disorders, including the various forms of Bursitis, osteoarthritis and capsulitis (backs, hips & shoulders), and are now recommending Intelligent Ice to their friends and acquaintances.

G.A.Chapman.
