Dear Intelligent Inventions.

My Name is Dr Jorge Andrade and I would like to tell you about my experience with the intelligent ice. I have been suffering from chronic back pain on and off for the last 7-8 years. Each year I throw my back out either by lifting something heavy, to stretching out the wrong way, for whatever reason I am out of commission for 3 days up to 2 weeks. It is very painful and disturbing to our economy, because of the stress the pain causes me especially with my mood and of course my family has to suffer with me sometimes. 2 days ago I threw my back out while lifting my son's bike to put it on the back of our truck. I immediately felt that sharp pain which turned into burning and the only thing I heard in my mind, was:" I guess it's that time again". Having remembered the intelligent ice I put in my freezer, I asked my son to hurry and get it for me. I apologized and told him I needed to do this and we would have to go another day to the park. I quickly wrapped the II around my low back took a couple of advils and lay down on the bed to rest, turned on the TV, and fell asleep. I woke up 2 hours later and decided to get off my bed, I did so slowly knowing the pain I can cause myself by moving to quickly. To my surprise I noticed the ice was still solid and it wasn't all that uncomfortable to get out of bed, I would actually describe it as soreness more than pain. I immediately lay back down and continued to leave it on. Hey "It's working, why mess with it" I thought to myself. So for another while I left it on. I put it back in the freezer waited for it to freeze again, and put it back on. To make a long story short the following morning I felt 80% better used it several times during the day and by the afternoon I was 100%! I am amazed and truly grateful I didn't have to go thru this yearly torture again. Thanks Intelligent Ice!!!

Best wishes
